WORK EXPERIENCE

Accenture

Software Engineer, AI & Generative AI

April, 2026 – Present

- Built a conversational AI assistant using Azure OpenAI (GPT-4.1-mini via Microsoft Foundry), integrated into a full-stack analytics dashboard.
- Developed ML-based rain prediction models using Azure Databricks.
- Implemented Azure Speech Service for text-to-speech functionality within the conversational assistant.
- Built and deployed a Next.js frontend (Vercel) with Azure Blob Storage integration for dataset handling.

Asian Land Strategies Corporation

Full Stack Developer

November, 2025 - April, 2026

- Developed a Laravel 10 QR Pass Management System with role-based access control and real-time dashboard updates.
- Implemented automated pass expiration via Laravel task scheduling with comprehensive logging.
- Built offline-capable scanner with IndexedDB caching and automatic sync for internet-free validation.
- Created audit trail system with analytics dashboard for pass usage and gate traffic reporting.

Phoenix Publishing House Inc.

Software Developer Intern

Feb, 2025 – May, 2025

- Enhanced and maintained a booking and scheduling system ensuring data consistency.
- Resolved booking conflicts and form validation bugs improving system stability.
- Prepared client presentations translating complex data into actionable insights.
